

Vege DHA™

Vegetarian DHA + Omega 3 Oil

Source of Essential Fatty Acids and DHA for the Maintenance of Good Health

Committed to the health and well being of our consumers and the environment, North Coast Naturals uses the best of science and nature to develop the highest quality certified organic nutrition and natural health products.

North Coast Naturals believes that people should have choices and alternatives when trying to meet their nutritional needs. Those with allergies, those who have chosen alternative dietary lifestyles and those looking for clean whole food supplements can find options with North Coast Naturals that are plant based, whole food sourced, certified organic, vegetarian, vegan, or alternatives to common allergenic foods and animal based supplements. The reasons people have for making dietary choices vary, so that is why North Coast Naturals provides a broad range of sensible nutrition solutions, alternative choices and options.

Our Vegetarian Alternatives have been created to provide commonly used supplements in 100% vegetarian forms.

Vege DHA is Fish Friendly

Up until recently, concentrated DHA supplements were all made from fish. Alternatively, North Coast Naturals has developed Vege DHA using a vegetarian DHA made from algae. Cultivated in an FDA inspected facility, this algae goes through a series of sustainable, all-organic processes to create an oil that delivers the same amount of DHA as fish oil. In addition, Vege DHA is available in LiquidVeggie-Gels™ vegetarian softgels made from the carrageenan in red seaweed, making it a completely animal-free DHA supplement. Vege DHA has no disagreeable odor, no fishy after taste and is 100% vegetarian.

Vege DHA Delivers:

- Vegetarian source of DHA and Omega 3 Oils
- DHA from Vegetarian Source harvested from a sustainable, controlled, farmed environment
- Free of oceanic contaminants
- Free of PCB containing fish oils and no fishy aftertaste
- 100% Vegetarian "LiquidVeggie-Gels™" softgel capsules

[For the maintenance
of good health.]
